

Lithium battery is a totally different market, and that's why it's servicing needs a different approach, such as:

- Different skill set is required.
- Different technology is required.
- Different safety protocols are required.

Answering the rising demand, ipower introduced the first-of-its-kind advanced service centre for EV batteries all over India.

## NEED FOR BATTERY SERVICE CENTRE

### Benefits for customer

- Enhance the performance of the EVs which further develop confidence in the EV user and that leads to better marketing.
- Reduces the chances of any failure or battery related accidents.

- Helps the EV fleet based businesses.
- Helps the battery manufacturers to understand the batteries performance.
